EP 906596	A1	G		G05B-019/418	Based on patent WO 9750025
-----------	----	---	--	--------------	----------------------------

Designated States (Regional): AT BE CH DE DK ES FI FR GB GR IE IT LI LU
MC NL PT SE

Abstract (Basic): DE 19624929 A

The automisation system has an operating and monitoring device (1) coupled via a communication device (4) to a data bus (6) linked to the process technology modules (8-11). Each of the latter has a memory holding specific information relating to the function of the module and a communication interface (29-32) for allowing the specific information to be transmitted to the communication device during an initialisation phase.

The specific information for each technology module is stored in the communication device for access by the operating and monitoring device, with a service interface (37) pref. used for input and storage of additional information relating to the specific measuring, control and regulating installation.

ADVANTAGE - Simple modification of atomization system.
